Revolutionize Your Finance Operations with Touchless Document Processing

Gia|Docs®

Cognitive Data Capture AI
*Fine-tuned Receivables, Payables and Treasury*

EMAGIA™

Documents in Global finance - AR, AP and treasury operations - are complex in nature

Document processing is very complicated because of the many formats, languages and document types coming from many external sources - your customers, banks, logistics providers and other financial supply chain partners.

Data extraction from invoices, checks, remittances, lockbox files, bank statements, receipts and other documents is very cumbersome and very costly for global finance and treasury organizations.

Manual data extraction is expensive and time-consuming. Robotic Process Automation(RPA) does not work well with multiple unknown document formats. Most companies outsource finance and treasury document processing (BPO) or shift the processing to lower cost shared service locations (SSCs). Most companies also incur thousands of dollars in banking lockbox and data entry fees.

Average check processing and posting cost is about $2.5

Welcome to the Future of Finance – Touchless Documents Processing with AI

No more copy and pasting.

No human will ever need to extract data from finance documents manually.

No more manual data entry.

Introducing
New Hyper efficient
Gia Docs AI

Leapfrog into the digital age.

Experience the next generation cognitive AI for data capture.

Process thousands of finance documents PDF and image files in minutes.

Now fine-tuned for finance and treasury operations.

Now with digital finance assistant that can read and talk intelligently.

Gia|Docs®
95%
Cognitive Data Capture AI
Fine-tuned Receivables, Payables and Treasury

EMAGIA™

Self-learning Finance Document Data Capture Assistant with Vision and Voice

Assistant that has vision and voice. Trained to read, extract and learn from every document so you don't have to. Simply use voice to search and get information from any document.

Experience the efficiency gain.

Who can use Gia Docs AI?

Accounts receivables and accounts payables staff, cash application staff and treasury teams

EMAGIA

How can you use Gia Docs AI?

Simply upload your scanned documents PDF or JPG or other types and get back neatly extracted data in CSV and other formats.

Gia Docs AI learns every time you correct the extracted data
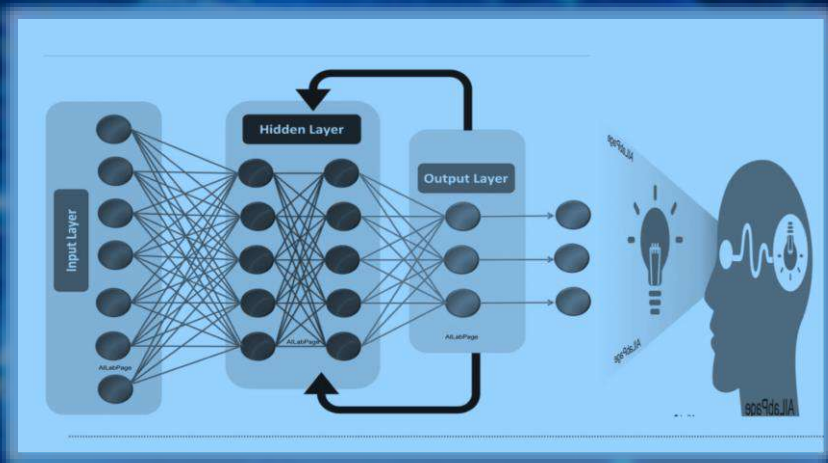

What's the big deal about Gia Docs AI?

No Fixed Templates for OCR: Manual data extraction or template based OCR and RPA extraction works on fixed formats only. Your documents from customers, banks and other providers come in many formats.

Mimics Human Intelligence: Gia Docs AI can read any format of remittances, checks, invoices and other documents. It has the intelligence to read, self-learn and extract data coming in various formats using deep learning.
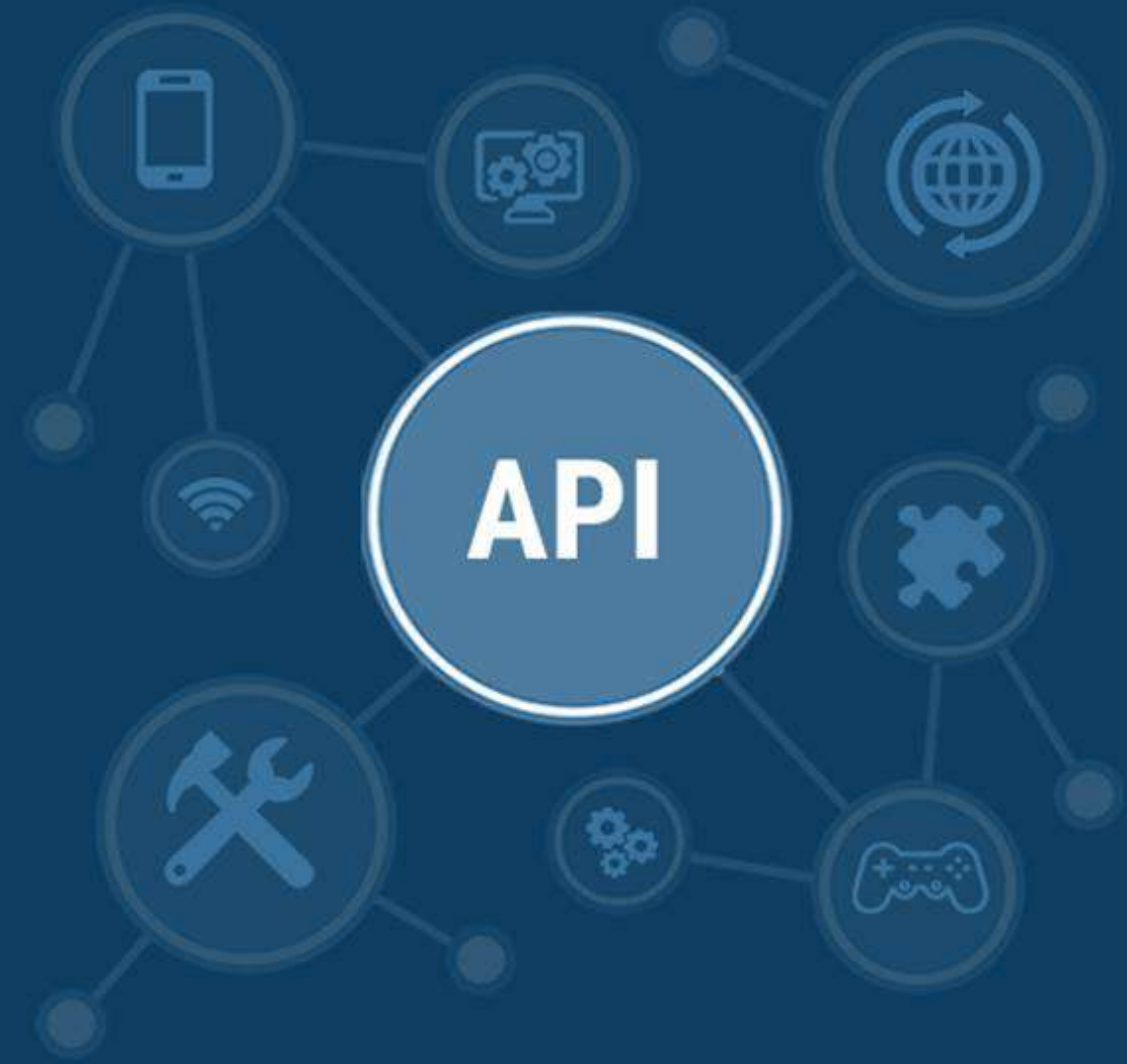

Fine Tuned Now for Finance and Treasury Documents

Add to your ERP

Integrate into your business process automation easily. Gia Docs APIs can connect with the AR and treasury modules of your ERP.
You can not only transform unstructured data from documents to structured formats, but can now run a data-driven business process.

Experience The Exponential Impact.
